

Dr. Doolittle

Oldenburg, Bay, born 1999, 16.2 hands

Two legends in dressage are the creators of this radiantly beautiful black stallion: Donnerhall, Oldenburg's model stallion par excellence, and the Thoroughbred, Lauries Crusador, the 2006 Stallion of the Year in Hanover. These two bloodlines have dominated the results in the dressage rings at recent Bundeschampionships.

Dr. Doolittle's pedigree is rounded off by the black Trakehner stallion, Argument, who is also the sire of Isabell Werth's Antony FRH. The widely branched Hanoverian dam line was originally especially known for the performance sire, Servus (State Stud Celle) and the German Champion Mare, Ascona, but also for Rheingau, a sire at the State Stud in Warendorf as well as 30 other licensed stallions. So performance has been an outstanding trait for many generations!

Dr. Doolittle qualified for the Bundeschampionat as a five and six year old, immediately won his first medium level dressage tests when he was six and in 2006 when he had just turned seven, he placed in several advanced level dressage tests, bringing home two ribbons for second place.

At foal championships, Dr. Doolittle's off-spring have been excellent advertisements, qualifying for the final at the German Foal Championships in Lienen. In 2003 he received the 1c main premium for stallions with emphasis on dressage at the Oldenburg approval and his very first crop produced a premium stallion. Dr. Doolittle – ultra-modern styling based on a solid dam line.

Licensed for Oldenburg, Rhineland, Hanover, Westphalia, all southern German associations, Belgium, The Netherlands and Sweden.
